

DID YOU KNOW?

RAF Lakenheath is preparing to become the first US Air Force base in Europe equipped with the nuclear-capable F-35A Lightning.

The new B61-12 guided nuclear bomb is likely to be arriving in USAF Lakenheath in 2024. We do not know how many.

USAF Lakenheath is used to deploy F-15E planes to Syria, Libya, and Afghanistan.

Planes land in Jordan to bolster US presence in the region after Israel declared war on Hamas and Gaza.

Planes from USAF Lakenheath regularly perform joint exercises with Israeli and Saudi air forces.

The UK is increasing its stock of nuclear warheads from 225 to 260, breaking the Nuclear Non-Proliferation Treaty.

PROTECT THE CLIMATE - BAN ALL MILITARY AIRPLANES

An F-35 combat plane costs \$78m and when flying costs \$38,000 an hour.

The F-35 does 0.6 miles per gallon. A diesel car averages 46.

There are 15-30 flights every weekday from USAF Lakenheath.

STOP THE UK BECOMING A TARGET!

Lakenheath Alliance for Peace

A coalition of 30+ groups dedicated to preventing the return of nuclear weapons to USAF Lakenheath
